## Experience

### Polaris Bank

Ikeja, Lagos.

*Software Developer (Contract)*

*Oct. 2024 – Dec. 2024*

- Implemented User Interface designs provided by the design team using Flutter widgets and ensured responsive and visually appealing user interfaces & experience
- Integrated APIs for these features: Target Savings and Safe Lock, and handled the state across features using Provider and Dio.
- Collaborated with the QA team to identify and fix bugs in the application, increasing the responsiveness of the application by 100%

### Scelloo

Lekki, Lagos.

*Software Engineer (Full-time)*

*Apr. 2023 - Present*

- Transformed 100% of the Figma design blueprints into living, breathing UIs that captivated users.
- Implemented real-time communication using WebSockets to handle dynamic data updates, such as live shipment tracking and trip status updates.
- Forged seamless integrations with backend APIs, Google services, payment gateways, and APIs to enhance application functionality and manage state using Flutter Blocs, Provider.

## Projects

### Vulte (Dart)

- A fully digital bank accessible via your smartphones and other smart devices. It offers easy, fast, and reliable solutions to meet your banking needs.
- Implemented the Safe Lock features that allow users to earn 10% interest per annum on savings
- Implement the Target Savings feature, which allows users to set goals toward a target with a minimum deposit of \$10

### MuleEx (Dart)

- Platform that offers streamlined transportation and delivery processes for enterprises of all sizes.
- Implementing in-app alerts for critical updates, like delays or changes in shipment status.
- API Integration of payment gateways such as Paystack to process orders and service payments.
- Implemented web socket to enable live updates of shipment and trip details, aiding communication between the app and backend services

## Skills

- Dart, Bloc, Provider, MVVM, Restful APIs, Git, Flutter, Firebase, Figma, Jira, Dio, GetX, Hooks, React-Native

## Certifications

### Flutter Advanced Course – Clean Architecture with MVVM

Udemy

*Credential ID UC-98aeb935-49ac-4be9-a305-eb448c71d934*

*June 2024*

- Coursework: Dependency Injection, Routes Manager, MVVM - Model - View - View Model Pattern, Caching APIs responses, Data Layer - Creating Mock APIs (Stub APIs), JSON Serialization and Annotations, State Management (Stream Controller - RX Dart - Stream Builder).

### Flutter Bloc Essential Course

Udemy

*Credential URL: <http://ude.my/UC-aa5757cd-4dd5-4b51-be96-61112fe3638c>*

*December, 2024*

- Coursework: Cubit/Bloc concept, BlocProvider, BlocListener, BlocConsumer, RepositoryProvider, MultiBlocProvider, MultiBlocListener, MultiRepositoryProvider, BuildContext extension methods: read, watch, select, Combination of Cubit, Bloc, and StreamSubscription.
